Introduction

Many organizations all-over the world have used the ISO9001 quality management system standard as a framework for managing quality assurance within their operations and meeting the expectations of their customers. They have enjoyed the benefits of this structured approach to the control of risk and opportunities in their business.

Quality Assurance in Practice will provide delegates with a sound understanding of a practical approach to developing quality assurance in their organizations. The seminar examines the well-known ISO9001 framework as a foundation for developing quality assurance. The seminar goes on to look at the importance of risk based thinking, the PDCA approach and the process approach. Additionally, the seminar explores other importance aspects of developing a quality management system including the role of audit in organizational improvement and the development of document control to support your system are encompassed in this highly practical and participative seminar.

Objectives

By the end of this training seminar, delegates will be able to:

- State the benefits of the PDCA approach
- Understand the importance of risk based thinking in a quality management system
